

CAJA SUSPENSIÓN COMBO 16A/32A IP65

28000

- This line of swap bodies offers a high level of agility in assembly lines and in industrial automation systems .
Its vertical movement guarantees more mobility for employees and more work stability for teams
- Possibility of mounting with IP44 and IP65 sockets
- Top plate with hole for M20 and markings for M25 and M32
- Screws and support wire in stainless steel
- Metallic accessory for compressed air connector
- Blind version with degree IP44 and recessed version IP65
- Cable gland M20
- Recommended cable 3G2.5
- Technical characteristics
- Insulation voltage 500 V
- Nominal current 16 A – 32 A – 63 A – 125 A
- Degree of protection (IP IEC/EN 60529) IP65
- Impact resistance (IEC/EN 60695-2-10) IK07
- Maximum operating temperature 70 °C
- Use temperature according to reference standard -25 °C / 40 °C
- Material / Material Technopolymer
- Compatibility with cable glands M20 / M25 / M32
- Standard / Standard IEC 61439-3
