

Meckind Banding Tape Steel

The Band could feature variable dimensions (thickness, width) and it is supplied in Rolls of 30 and 50 meters length. The Rolls may be packed in carton box or in plastic dispenser, the latter is mostly used in presence of high humidity or wet weather conditions.

The operator shall unroll a Band length suitable for the fastening operation to be done, the related Buckle is positioned inside the Band, finally by operating the proper mechanical Tool the clamping is completed.

The three components together, Band + Buckle + Tool, are creating the Clamping System and they are fully provided by Meckind.

Technical Information

Material: **Stainless Steel Grade AISI 430, 201, 301, 304 or 316**

Working Temperature: **-80° +538°**

Flammability: **Fireproof**

Other Properties: **UV-resistant.**
